IT Talent Consulting Group

About Us

IT-CRG: is a consultant group by a qualified researchers and experts of information technology fields. This group is interested of dealing with current challenges and problems can be found in the large or SMEs companies.

IT-CRG: helps you clearly to find the best practices to the most sensitive and critical areas in the software industry. It also can guarantee a problem solving to the real existing problems that may have cost-effective in your own area.

IT-CRG: online since 2011, offering daily information to the communities, a large number of articles, with the active forum with over 200 members.

Mission

Everyday Information Technology (IT) is expanding dramatically, and new technologies with new human needs are causing clearly problems. Smoothly, our team of consultants is able to deal with the problems with optimal solutions.

Vision

Our team of consultants is willing to discover and look at complex data in your own business and present optimal solutions with best practical ways.

Our Message

We believe in a better tomorrow, we present better solutions, we create technologies, and we achieve higher capability by the consultants who encourage you to be in the right path and best and brightest solutions in IT industry. We smartly focus on advising organizations and recommending the community of IT industries by our talented group of researchers and expert people.

Our Areas

Indeed, IT-CRG is interested to provide the consultations on the following areas;

1) Research Consulting

We use our knowledge services to advise on Problem-solving by presenting a consultation through interactive and talent researchers (Big-Data, Cloud Computing, Information Security Analysts, Software Re-Engineering, Software Quality, Project Management, Data Mining, Software Development, Software Testing) areas.

These areas supported by **specialized consultants** in the fields of industry and research mode. We also conducted different research methodologies and then choosing the appropriate research methodology such as qualitative, quantitative, action research, case studies, grounded theory and other research methodologies are used by consultants such as ethnography (participant observation) interviews (structured, semi-structured, and unstructured) groundwork (reviewing existing documentation and reports).

After all, we use our knowledge in **consulting in publications** by through the expertise from this work. Publishers worldwide such as Scopus, ISI, or other rankings are moving to expand their content in line with levels of paper quality, the consulting in IT consulting and advisory work was done by our consultants to provide the papers high-level of quality.

In order to that, the overall our databases articles, we focused on **Journals and Conferences** as outlets for publication in our works. Publishers like (Emerald Insight, Elsevier, Springer, Inder science Online, Wiley Online Library, IAJIT, AISEL, SCITECH, Taylor & Francis Online, CCSENET, IJMSE, Insight society, SDMIMD, CARI, IJARCSMS, MDPI, TCoB& MEIS, QUESTIA, Scientific & Academic Publishing (SAP), University Utara Malaysian Institutional Repository, IJSET, and Macro think.

2) Technical Consulting

A Good technical consultant can save your efforts and risks when are you trying to achieve your own business through a combination of scientific and engineering experts in the sections of business and technology services, computing consultancy, technology consulting, and IT advisories.

Our team can help you in a problem solving to the real projects (Enterprise Resource Planning (ERP) systems, Business Resource Planning (BRP) systems, Companies Business Role Best Practices, Software Product Lines - Factories) in the type of system as already-made software- **Packaged Software (PS)** which relied on the standardizations.

We can help in the content management systems (CMS), web applications, dynamic e-commerce applications, special management systems which relied on the customer demands in the type of system as tailored software- **Bespoke Software (BS)**.

We also can help in the **Hybrid systems consulting** which are considered as a Packaged Software is integrated with Bespoke Software using customizations and integration techniques.

In other hand, we support **Consulting in the Digital data service** (Digital Electronics, Digital Media, Digital Content, Digital Economy, Digital Media marketing). And small and medium enterprises projects **SMEs Consulting** strategies of planning, development, and management.

3) ISO Consulting

In fact, more than 10 million organizations are certified in ISO 9001 in 170 countries. There are two categories of enterprises which have been classified into the Large enterprises (LE) and SMEs enterprises (Micro, small, small and medium-sized enterprises).

Each type has different challenges which made the organization sometimes get confused between different ISO Certification so they search for advisors or consultants. Our team can help you by expert consulting programs and online platforms in the Inspection, auditing, review to gain your won ISO certificate (ISO 9001 Quality management, Software Development using ISO/IEC 29110). Our team of experts is consulting to support options of management consultancy services (Quality Management Systems Development, Training, & Implementation), and service management system (SMS) standards.

In today market, there are a huge number of SMEs organizations are struggling with software management, and software quality projects, that's why helping small businesses is necessary and effective to deliver right products and services in order to be certified by ISO certifications. Our expert dedicated consultant directs and assists in the implementation of your ISO/AS Standards.

4) IT Training Courses:

We provide a list of available IT training courses for different technologies by meeting our developers online or the place of work through real-world practical computing issues in programming languages such as (Java, Android, C#, ASP, VB, MATLAB, and others).

We are targeting the individuals, private teams, organizations, schools, and universities to accelerating the capabilities and improving the skills for them. Our courses touch the business needs in the real-world

industry by providing new different solutions and content with free resources of guidance, blogs, live and on-demand sessions.

We have two types of training; first one Training Courses in a schedule, second one Training Courses based on client demands too. These types can be conducted globally in different languages of speakers (English, Arabic) mainly. And they can be conducted inside our industry-leading classroom or outside in the client's location.

Team Members

Our team organized to present a logical approach to problem-solving/analytical skills to the societies may be non-IT clients and trained to be excellent customer service skills.
